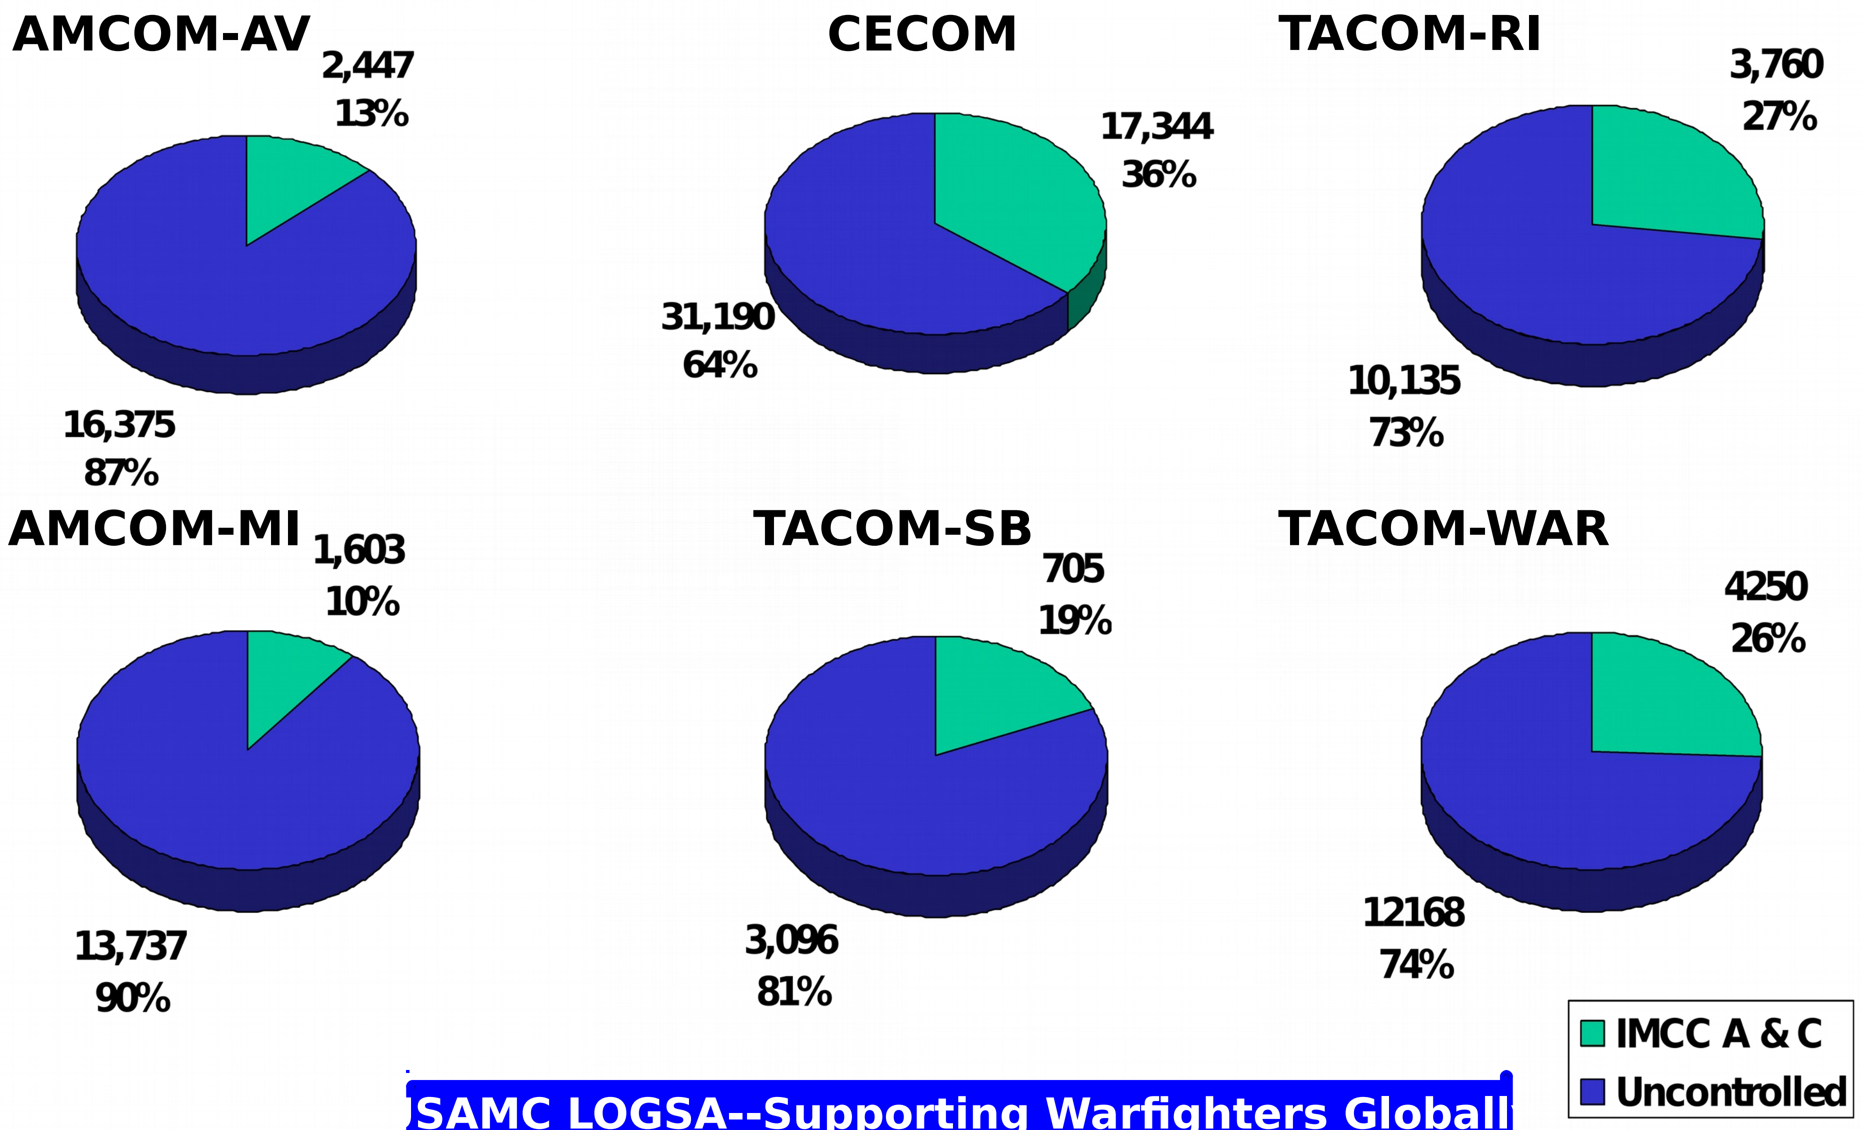
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – Sep 06



Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,253	1,194
AMCOM-M	1,176	427
CECOM	17,080	264
TACOM-W	596	3,654
TACOM-R	1,703	2,057
TACOM-SB	574	131

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
